PRODUCT OVERVIEW

Liberty's 2x1 switcher with HDBaseT signal extension from their DigitaLinx series offers the ability to share content from any source to a high-definition display. These products are backed by a 5-year warranty and a lifetime of technical support. Offering sleek commercial-grade housing, these high-grade AV extenders provide a simple and flexible solution for any application, including education, commercial, and medical.

Choose between two models -

- 1 HDMI + 1 VGA single-gang wall plate with HDMI receiver: **DL-1H1V-WPKT-H2.**
- 2 HDMI single-gang wall plate with HDMI receiver: **DL-2H-WPKT-H2.**

Whichever model you choose, it will extend the source content such as a PowerPoint presentation from a laptop to a display such as a TV monitor.

Highlights

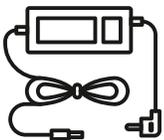

Signal Extension: Transmit 1080P AV signals up to 230ft/70m or 4K AV signals up to 131ft/40m via a single category CAT6+ cable.

AV Switching: Automatically or from a push button located on the wall plate.

Easy Configuration: EDID settings will be found on the receiver, which allows for the video source to send out a video signal that is supported by the display.

Reduced Power: Supporting one-way power over HDBaseT (PoH) on the receiver which powers the transmitter over the same category cable used for AV signal extension. PoH is unique to the HDBaseT standard to bring more power to the devices that require it.
