

1. Before cutting into the table top, confirm that the product you are installing is the DL-SC41UP-BXTX as this template is only for this product
2. Cut out the 'surface cut-out area' from the template
3. If printing from online 'print to fit' only
4. Use the cut-out to mark the position on the table top where the device will be installed
5. Always measure twice and compare to product before making a cut into the table
